

Executive Summary

Market volatility calmed down during the second quarter as concern over a banking crisis subsided. Investors seemed to turn their attention to improving inflation and economic data reducing probability for a deep recession and the Federal Reserve continuing an aggressive rate hike strategy. Equities continued to have strong performance on a global basis across all asset classes. US Large Cap equities continued to be the best performers as large cap growth stocks continued to dominate.

The S&P 500 Index returned 8.58% for the quarter. Growth stocks continued to outperform value stocks as investors looked towards gains in AI (Artificial Intelligence). International Equity markets continued to rebound but at a more moderate pace, up 3.09% as measured by the MSCI EAFE Index. Small cap stocks, as measured by the Russell 2000 Index, were up 6.83%.

The BRI Pools with equity exposure had strong performance during the quarter. The Aggressive Growth and Income and Growth both outperformed their respective benchmarks. The Growth fund performed slightly under benchmark due to the small cap manager lagging for the quarter and the overall international exposure in the pool being less than the benchmark allocation.

The fixed income markets posted negative returns across all maturity structures during the quarter except for US Treasury Bills. Fixed Income, as measured by the Bloomberg US Government/Credit Index, returned -0.81% versus 1.33% for US Treasury Bills. The fixed income focused pools performed well for the quarter. The Capital Preservation fund significantly outperformed for the quarter while the Conservative Income performed in line with its index.
